**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

the claimed invention is directed to non-statutory subject matter.

Claims 1 and 6 recites, "...provisioning network services...", however, the claims do not indicate that the final result provides practical application of such provisioning network services and do not meet the requirement of practical application that produces a useful, tangible and concrete result.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 12, 20 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Lo et al (US Pub. No. 2002/0156914).

Regarding claim 12, Lo et al disclose a device comprising:

a user application requiring communication services from an optical communication network; and

an optical service agent operable to determine a set of communication services required by the user application, the communications services including at least one of unshared lightpath, shared lightpath, routed path, latency, error rate, and protection mechanism, and provision the set of communication services for the user application (see paragraphs [0009, 0026-0033, 0038-0046]).

Regarding claim 20, Lo et al disclose system comprising:

an optical communication network; and

a network user application coupled to the optical communication network, wherein the network user application comprises an optical service agent for obtaining optical communication services from the optical communication network via a user-to-network interface (UNI) sufficient to support operation of the network user application, the communications services including at least one of unshared lightpath, shared lightpath, routed path, latency, error rate, and protection mechanism (see paragraphs [0009, 0026-0033, 0038-0046]).

Regarding claim 21, wherein the optical communication network comprises an automatically switched optical/transport network (ASON), and wherein the UNI comprises an ASON UNI (see paragraphs [0031-0033]).

***Allowable Subject Matter***

4. Claims 13-19 and 22-26 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kirkby et al (US Pub. No. 2002/0097747) is cited to show management and control of multi-layer networks.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalzid Singh whose telephone number is (571) 272-3029. The examiner can normally be reached on Mon-Fri 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Chan can be reached on (571) 272-3022. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
